

Question(s) for rec06 - More Copy Control

6. Consider the following code. What would be the result when attempting to compile-and-run the program? Completely fill the circle next to your choice.

```
int main() {  
    vector<int> v {1, 4, 9, 16};           // Line A  
    int* p = &v[3];                       // Line B  
  
    v.push_back(25);                       // Line C  
    v[3] += 1;                             // Line D  
    cout << *p << endl;                   // Line E  
}
```
